

# ARTISTRY™ 6-PC. BRUSH SET **PRO TIPS**

The best in makeup deserves the best in brushes – Artistry™ brand delivers both! These six tools let you effortlessly line, define, blend and contour like a professional makeup artist. **Use these tips to create endless Artistry™ looks.**

## FOUNDATION BRUSH

Densely-packed, angled synthetic fibers offer complete control for evenly applying and blending foundation on your face and neck, including your nose, chin, eye area and hairline.

### PRO TIP:

Pump foundation directly onto the top of the brush and then blend evenly on your face. Also try using the brush to press cream blush into the apples of your cheeks.

## POWDER BRUSH

With its finely-milled, synthetic fibers and flexible shape, this high-performance rounded and tapered brush gives a lightweight powder finish on your face, neck and décolleté.

### PRO TIP:

Use the brush to apply body products and add shimmer to your décolleté.

## HIGHLIGHT/CONTOUR BRUSH

With a wide and thin side, this multi-purpose brush lets you contour the angles of your face and lightly highlight to create definition. The fan shape allows for delicate placement of color.

### PRO TIP:

Use the brush to remove excess powder or hold it under the eye as a screen when applying eye shadow.

## CONCEALER BRUSH

Gentle synthetic fibers in a flat, rounded paddle shape offer precise application to diminish your imperfections, dark circles and uneven skin tone.

### PRO TIP:

Apply product onto the top of the brush and gently dab under your eyes – the soft fibers won't irritate this delicate area. Use the brush to apply eye serums and creams by gently patting around your entire eye area.

## EYE SHADOW BRUSH

Dense, tapered synthetic bristles let you apply, layer, blend and smudge eye color to your lid and line areas.

### PRO TIP:

Press (rather than sweep) eye shadow onto your lid for more even, gentle application. Use brush tips to smudge eye shadow on the outside corners for a dramatic smoky eye effect.

## EYE LINER/BROW BRUSH

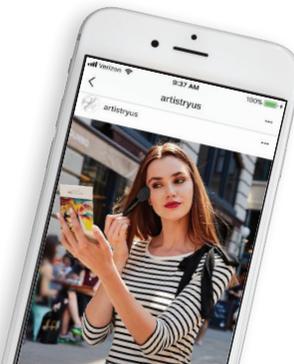

With its thin profile and angled structure, this brush makes for easy, accurate shadow and liner application. Soft fibers are gentle on the delicate eye area and angled bristles are perfect for brow shaping.

### PRO TIP:

The angled tip allows you to create a thin, even line – perfect for creating a cat eye. For brows, simply blend upward starting from the beginning of the brow and move outward.
