

THE NUTRILITE™ BRAND & NSF INTERNATIONAL CERTIFIED QUALITY & SAFETY

Nutriline™ products have always had the highest level of quality – from seed to supplement.

Now, we've invested in a new third-party independent certification from NSF International, one of the most respected independent certification organizations in existence today. This new certification greatly expands the Nutrilite™ supplement portfolio of certified products in North America.

The Nutrilite™ brand and NSF certification mean credibility.

When customers see the NSF seal on Nutrilite™ supplements, they can be assured these products are credible, contain the ingredients on their labels, are safe, and meet the highest standards possible.

NSF certification is not an easy or inexpensive process.

This shows Nutrilite™ products are exceptional. NSF certifies the Nutrilite™ brand's manufacturing facilities, and each individual product, to ensure the contents in every certified supplement match the printed label, and are present at the level specified. NSF also certifies that these Nutrilite™ supplements are safe and free of harmful contaminants.
